

A photograph of two white geese with grey heads and red beaks standing on a grassy field. The geese are facing left, and their long necks are extended. The background is a mix of green grass and brown earth.

REPORTING TOOL

User Account Registration Guide

15 December 2022

Introduction

The user account registration is a two part process: The first part involves you signing up for an account while the second part involves a system administrator enabling your account and assigning you user rights. This document shows how to register for a Reporting Tool account. Its role is to provide a step by step guide for a user account registration. It also points out the best environment to run the system.

Prerequisites

The instructions in this document assumes that the system has been installed and made publicly available online

Recommended Usage Environment

Browser Requirements

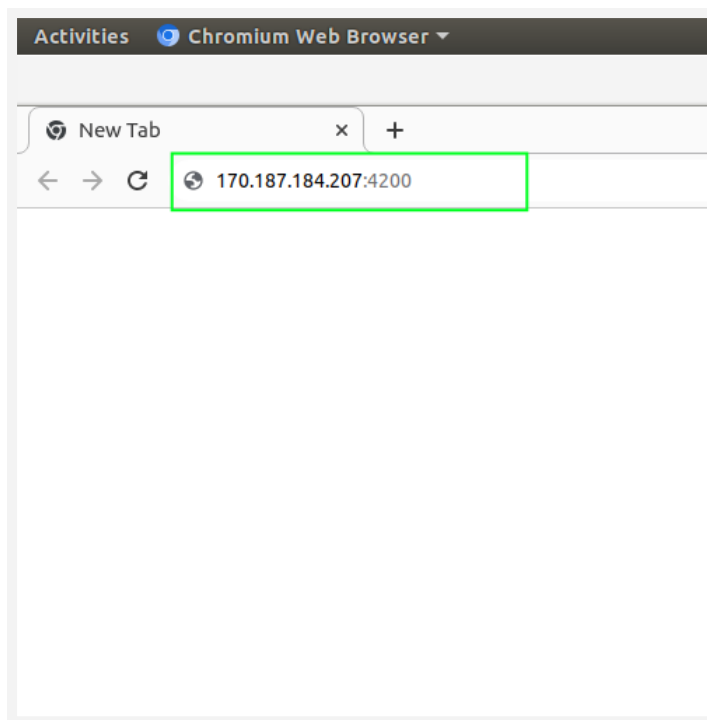

The Monitoring System has been developed to deliver an application's graphical user interface through any HTML5/WebGL compatible browser. Performance varies by browser, with **Mozilla Firefox** delivering the best overall experience. We test on the latest version of each browser and recommend end users use the latest version as well. If, for some reason, one cannot update to the latest version we recommend using the most stable release option available.

Network Requirements

The following requirements must be met in order to successfully connect to and use the Reporting Tool:

	Aspect	Minimum Requirement
1.	Internet Down Speed	10Mb/s
2.	Internet Up Speed	2Mb/s

Steps

1. Open your browser and type the system's address 170.187.184.207:4200

2. Click the **“GET STARTED”** button; this should redirect you to the registration / login page.

Your account has been successfully created

An account activation link has been sent to your email

GO TO HOMEPAGE

[Have an account? Go to login](#)

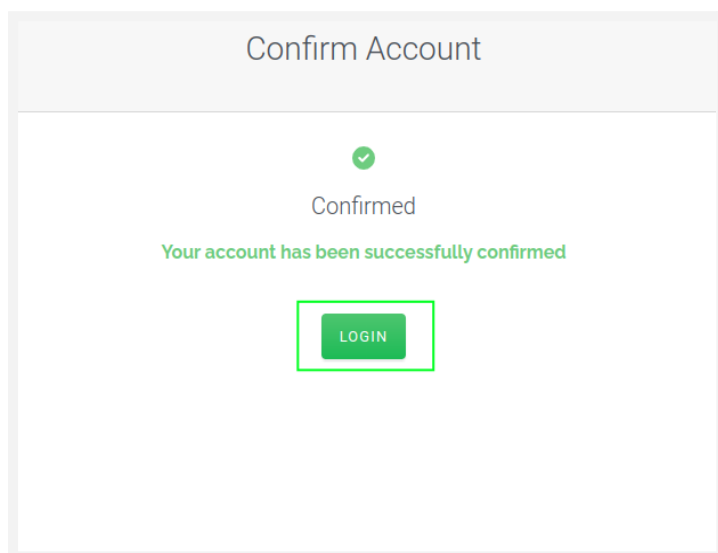

5. Ascertain that your account was successfully created before proceeding to your email account to activate it.

6. Locate the Registration Confirmation email and click the account activation link.

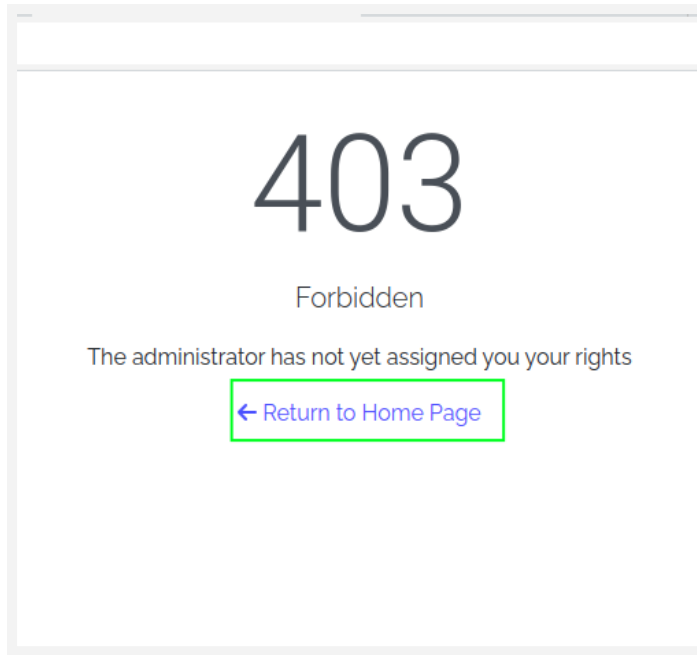

Note

The system expects you to activate your account within an hour of receiving the link.

7. Ascertain that your account has been successfully confirmed before clicking the “**LOGIN**” button.

8. Enter your email and password then click the “**LOGIN**” button

9. Ascertain that the system displays a message that states the administrator is yet to confirm your account.

Note

When the administrator confirms your account and assigns you rights, you should be able to successfully log in

Otherwise, the first part of your registration is now complete. Please click the “**Return to Home Page**” link to return you to the system home page
